PINE HILL RESIDENTS:

Due to the recent changes in recycling markets, please note Pine Hill's

UPDATED GUIDELINES FOR OUR RECYCLING PROGRAM

Recycling processing facilities are now requiring that each delivered must not exceed certain levels of contamination. To simplify this new policy, we listed the new recycling rules on the opposite side of this letter.

WE ALL NEED TO WORK TOGETHER TO KEEP THE COST OF RECYCLING DOWN AND ENSURE THAT WE ARE RECYCLING THE MAXIMUM AMOUNT OF THE PRODUCT.

If the recycling loads collected from Pine Hill by our Outside Contractor are determined to be contaminated, The Borough would incur additional fees for the recycling from the Outside Contractor when they have to reload the recycling and take it to the trash disposal facility. This could create a very serious financial burden for us as taxpayers.

THE BEST WAY TO APPROACH THIS NEW PROCESS IS:

IF YOU ARE NOT SURE IF AN ITEM SHOULD BE RECYCLED OR IF YOU ARE NOT SURE IT IS CLEAN ENOUGH TO RECYCLE, PLEASE PUT IT IN THE REGULAR TRASH

We always want to recycle as much as possible, so please keep in mind, if a recycling load is contaminated with trash, we risk the entire load being rejected. This would not only result in an unnecessary financial burden, but could cause a substantial quantity of otherwise recyclable material, to be disposed of, and not recycled. The Borough relies on recycling grant money that is based on the success of its recycling program. We ask that you please do your part with this effort.
